

## Renewal of the airport website

Chubu Centrair International Airport has renewed its official Website for the first time in 6 and half years.

This time, apart from the inclusion of the new Terminal 2, we changed the design to make it easier understand and to use. Furthermore, being a 70% of the website visitors' smartphone users, we aimed for an App-like look that would work well in all devices. Once again we improved our foreign language sites, to enhance the information provided to international visitors.

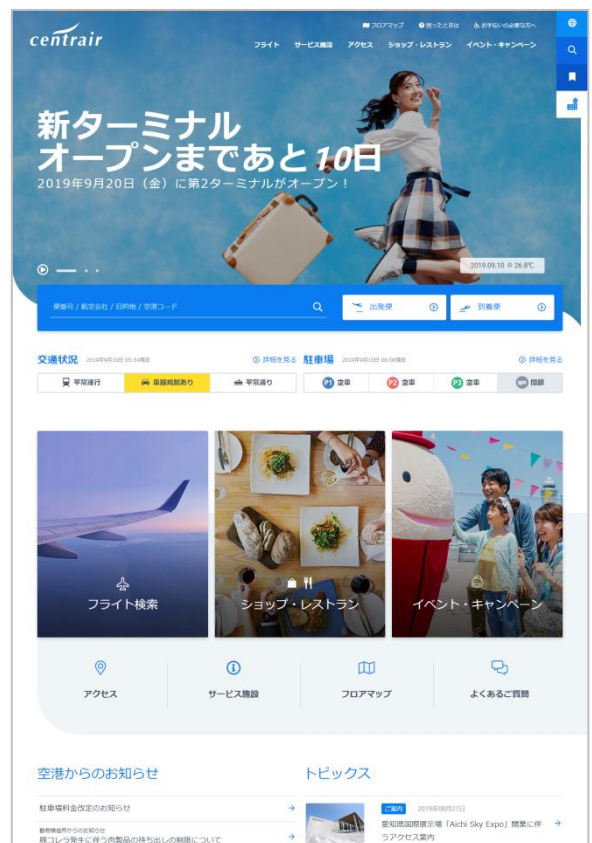

We are aiming for a website that is attractive as well as convenient, that provides all the necessary information for travellers and showcases the character of Chubu Centrair International Airport for international and local visitors.
