

## About the acquisition of AHA certification for measures against infectious diseases

Central Japan International Airport Co., Ltd. is pleased to announce the receipt of the "Airport Health Accreditation (AHA) Program" accreditation conducted by the Airports Council International (ACI)\* thanks to the various countermeasures against infection that have been implemented in the airport following guidelines. Being Chubu Centrair the third Japanese airport to receive this accreditation after Narita International Airport and Fukuoka Airport.

AHA certification for Centrair by ACI

The ACI Airport Health Accreditation\* (AHA) is an international accreditation that assesses how aligned airports' health measures are with the ACI Aviation Business Restart and Recovery guidelines and ICAO Council Aviation Restart Task Force recommendations and the industry best practices.

The certification was achieved after a thorough evaluation of a wide range of 122 infectious disease countermeasures considered international standards, such as securing distances, efforts to eliminate contact, and providing information to visitors. In particular, the cleaning and disinfection of the terminal and measures to prevent infection among employees during work have been highly evaluated.

At Chubu Centrair International Airport, we will continue to strive to prevent the spread of infectious diseases to be a safe airport where travelers and employees can come with peace of mind.

\*Airports Council International (ACI) is an international organization representative of world's airport authorities, that provides exchange information on the development of technology and operation systems, the efficiency of airport management, and the improvement of environmental problems such as noise.
