

Official Online Shop to open in Centrair

Central Japan International Airport has opened its official online shop on 8th July, 2021, available only for people living in Japan.

The selling items are about 50 including stationeries with cute Centrair original characters, and cool tableware with plane motifs on them. These are usually sold at the airport's official store SORAMONO and in FLIGHT OF DREAMS, which meant that customers have to travel all the way to the airport to purchase them.

Thanks to the online shop, customers can access the products comfortably from home which might help the sales of the airport shops which are struggling due to the decrease of passengers caused by COVID19.
