New terminal building overview

Central Japan International Airport Co., Ltd. is happy to announce the overview of the new LCC terminal building.

The new terminal building will be designed to enhance passenger convenience and efficiency and ensure design flexibility for future expansion. The new terminal will help create new airport attractions in the southern part of the airport island, particularly after the completion of the commercial facilities planned to be built in the same area in the next two years.

- Overview of facilities
  1. Passenger capacity: 4.5 M p.a. (International 3.0M / Domestic 1.5 M)
  2. Total floor area: 40,000m²
  3. Building structure: Two-story dual-building (Check-in bldg. and Concourse bldg.)
  4. Aircraft parking: 10 spots

*Please note that the above plans are subject to change.

- Operation to start: First half of FY2019
- Map of the construction site
